

M.S. IN GLOBAL MEDIA AND CULTURES JAPANESE CONCENTRATION

The 12-month M.S. in Global Media and Cultures offers targeted bilingual preparation for careers in media, international business, and global leadership. Our program provides experiential training in media studies, cross-cultural communication, and advanced competence in a high-impact language and region. Students build a bilingual portfolio through internships, media production, research, and leadership opportunities.

Japanese Program

The graduate program in Japanese at Georgia Tech examines how Japanese is used in professional contexts, such as gaming, news, television, online media, and new media industries. Students acquire both a broad view of Japanese culture and a deep understanding of cultural frameworks as they pertain to their own professional interests. Faculty research areas of expertise include Japanese media industry, computer-mediated communication, advanced language and cultural studies, and online and blended learning, preparing you for roles in communications, consulting, bilingual business, and education.

Opportunities Abroad

Language for Business and Technology:
Beppu, Japan
